

IMPORTANT NOTE TO INSTALLER:
 Aluminum surfaces to be embedded in concrete ordinarily need not be painted, unless corrosive components are added to the concrete or unless the assembly is subjected for extended periods to extremely corrosive conditions. In such cases, aluminum surfaces shall be given one coat of suitable quality paint, such as zinc molybdate primer conforming to Federal Specification TT-P-645B or equivalent, or a heavy coating of alkali resistant bituminous paint, or shall be wrapped with a suitable plastic tape applied in such a manner as to provide adequate protection at the overlaps.
